I opposed HR 4026 and ask you to do the same. Satellite Radio has the same right to offer services to its users as FM and AM radio. This is healthy competition! If FM and AM radio offered better programming and information than XM I would not be a customer in the first place. XM has the right to compete in this market place and offer its customers traffic and weather. If XM was not allowed to offer these services it would give FM and AM an unfair advantage. I am willing to pay for the opportunity to listen to XM over free FM and AM radio. Please continue to allow competition just like you did with satellite TV and cable over local stations.
